

HURRICANE SURVIVAL KIT

One of the most important tools for emergency preparedness is your Disaster Supplies Kit. You'll need provisions to carry you through a week or more after the storm. Remember, there may be no electricity or clean water for days. Downed trees and other hurricane related debris blocking the roads will keep you from traveling far. Below are the most important items for your Disaster Supply Kit. Stock up today; store them in a water-resistant container; and replenish as necessary, especially at the beginning of the hurricane season – June 1.

- Two weeks supply of prescription medicines
- Two weeks supply of non-perishable/special dietary foods. Buy plenty of nonperishable foods, because there won't be any refrigeration.
- Drinking water/containers: 1 gallon per person per day for two weeks. It's a good idea to sterilize the bathtub and fill it with water just before the storm.
- Flashlights and batteries for each member of the family
- Portable radio and (7 sets) batteries
- First aid book and kit including bandages, antiseptic, tape, compress, non aspirin pain reliever, anti-diarrhea medication
- Mosquito repellent and citronella candles
- Two coolers (one to keep food; the other to go get the ice)
- Plastic tarp for roof/window repair, screening, tools, nails, etc.
- Water purification kits (tablets, chlorine (plain) and iodine)
- Infant necessities (medication, sterile water, diapers, ready formula, bottles)
