IDENTIFICATION AND ASSERTION OF RESTRICTIONS ON THE GOVERNMENT'S USE, RELEASE, OR DISCLOSURE OF TECHNICAL DATA OR COMPUTER SOFTWARE (DFARS 252.227-7017)

The Raytheon Company, acting through its Precision Attack and Surveillance Systems Division, asserts for its subcontractor, Rockwell Collins, that the Government's rights to use, release, or disclose the following technical data or computer software should be restricted:

Rockwell Collins retains all rights to executable and source code and documentation generated on the Cockpit Management System (CMS) and Common Avionics Architecture System (CAAS) installed on the US Army Operations Command (b)(2) High with the following exception:

The US Government is granted Government Purpose Rights (GPR) as defined in DFARS 252.227-7013 (Nov. 1995) and 252.227-7014 (Jun. 1995) on all CDU Operation Flight Program (OFP) source and executable code (CPN 612-0797-A01 plus subsequent releases), and documentation generated by Rockwell Collins as a result of plan development and documentation update efforts under contracts USZA95-99-D-0004 and H92241-04-D-0001. The subsequent releases shall be defined as the Avionics Management System and definition of the required development tools for the Army Special Operations Aviation's (ARSOA) system until such time as part number designations can be incorporated into the contract. The Government Purpose Rights shall remain in effect for a period of ten (10) years.

The basis of assertion is the development was accomplished with mixed funding.

The part number designations to be incorporated into contract H92241-04-D-0001 are listed in the following table.

Isolation API: The US Government is granted Government Purpose Rights (GPR) as defined in DFARS 252.227-7014 (Jun. 1995) on all Isolation API source and executable code. The Government Purpose Rights shall remain in effect for a period of ten (10) years.
