Pre-deployment checklists

Review these checklists as you and your family prepare for deployments. Not all items are relevant for all Operators/Enablers and their families. Focus on the points that apply to your unique situation. Identify a place to store important documents that is accessible to everyone who might need them. If documents are stored electronically, they also should be accessible to those who need to access them and backed up regularly. Extra lines are provided here for additional items you might need reminders for. The checklists included are:
