Stringent pet importation requirements took effect 01 Dec 12. For the most current information on PCSing with pets, please visit:
106th Medical Detachment Veterinary Service Support (106th MED DET VSS)
http://www.korea.amedd.army.mil/veterinary/index.html DSN (315) 737-9720

Korean pet importation requirements are also available at http://www.qia.go.kr
(Animal, Plant, and Fisheries Quarantine and Inspection Agency). English version at
(neither website accessible from military computers).

Care for pets at military veterinary treatment facilities (VTF) is limited and primarily provides routine preventive medical and surgical care. Emergency care is not available at military VTFs and civilian veterinary clinics are limited in some areas. Only 2 pets (cats and dogs only) are authorized transport in the event of a non-combatant evacuation operation (NEO) in Korea. All pets must be registered at the installation VTF upon arriving in Korea (or when purchased in Korea). Not all housing areas allow pets. When assigned housing in pet restricted areas, service members that have brought pets have been required to find new owners/pet housing arrangements (including shipping them back to the states).

Confirm housing options before transporting pets.

1. Korea allows importation of no more than four (4) animals per person.*
   a. Customs clearance is required upon entry into Korea. Service members must present travel orders and pet documentation at the Customs desk to request the SOFA import tax waiver. Pets imported more than 6 months after initial entry will be assessed an import duty.
   b. Pets shipped separate from the service member or their family may incur additional costs when they travel as air cargo. Owners should discuss the details of these costs with the transportation broker prior to shipment.

2. Dogs and cats less than 90 days of age at entry are not required to have been vaccinated and are exempted from FAVN testing requirements.

3. Pet travel from the US/CONUS area:
   a. Original health certificate (APHIS Form 7001; see appendix A for an example of a Military endorsed form) issued by an accredited veterinarian (endorsed by a USDA veterinarian unless signed and stamped by a Military/GS veterinarian in both blocks with a valid certificate number) must be presented at time of entry. All health certificates must include original signatures (in blue ink), no copies will be accepted.

4. Pet travel from locations outside of US/CONUS area:
   a. Consider contacting the Korean QIA office directly or through your sponsor to confirm the travel documentation for your pet’s travel.
   b. Original health certificate issued by an official government veterinarian from the host nation (eg. certificate and kennel stamp from the Japanese export veterinarian or an EU pet passport signed and stamped by a German government veterinarian) must be presented at time of entry. Service
members are directed to contact the servicing VTF for assistance. **All health certificates must include original signatures, no copies will be accepted.**

5. ISO compliant microchip *(ISO11784 or 11785)*:
   a. Mandatory for all dogs and cats regardless of age. Microchip number should be stated on official health certificate.
   b. Pets that do not have ISO compliant microchips should have a compliant microchip placed prior to travel (list both on health certificate) or the owner should transport a microchip reader.

6. Rabies Vaccination:
   a. Rabies vaccination should be performed at least 30 days prior to and be within the reported expiration date (1 or 3 year vaccination) at the time of arrival.
   b. Although not ideal, rabies vaccination may be performed prior to microchip placement.

Animals from a Rabies free country (according to current OIE standard)* must be microchipped with an ISO compliant microchip and be presented with an official health certificate but no FAVN test is required.

*Japan, Taiwan, Cyprus, Australia, New Zealand, Portugal, Iceland, Guam, Hawaii, Samoa, Cayman Islands, French Polynesia, Martinique, Department of Reunion, Wails and Futuna, Albania, Dominican Republic, Macedonia, Lichtenstein, Malaysia, Switzerland, Ireland, Fiji, Singapore, Jamaica, United Kingdom

7. Rabies Antibody Test *(FAVN)* for cats/dogs over 90 days old:
   a. Result should be equal or greater than 0.5 IU/mL.
   b. **Result should be stated in the remarks section (Block 9) of the health certificate (APHIS Form 7001). The name of the laboratory conducting the test and the date the sample was drawn must also be listed in the remarks section (See appendix A).**
      FAVN Serum/specimen draw date:
      FAVN Results:
      Lab: DOD FADL or Kansas State University
   c. Testing should be performed at least 30 days but **not more than 2 years** prior to travel to Korea.
   d. **ORIGINAL** test result report (not a copy) **MUST** be presented at time of entry.
   e. Results from these labs will be accepted as valid:**
      i. DoD Food Analysis & Diagnostic Laboratory
         [https://phc.amedd.army.mil/topics/labsciences/fad/Pages/Pet-Travel-Requirements.aspx](https://phc.amedd.army.mil/topics/labsciences/fad/Pages/Pet-Travel-Requirements.aspx)
         **Note:** Tests performed from 21 September 2012 through 1 January 2014 are not considered valid due to complications with the EU certification
   f. FAVN results are only valid for 2 years for entry into Korea.
Any dog or cat presented for entry that does not meet these requirements could be returned to their point of origin on the next available flight at owner’s expense.

Animals that are not returned to their point of origin will be placed in QUARANTINE:

1) Quarantine will be at the owner’s expense until compliance is met. Quarantined animals will be housed at an Official Approved Korean Quarantine Facility, which on average costs $20-50/day.

Quarantine release for a dog or cat will be dependent on resolution of the deficiency:
1. Valid health certificate from an official veterinarian (eg. APHIS form 7001); must be the original and endorsed correctly.
2. No microchip:
   a. An ISO compliant microchip must be placed.
3. Incomplete/improper rabies vaccination, absent/deficient rabies antibody titer (not greater than 0.5 IU/mL):
   a. Revaccination for animals as appropriate.
   b. Test will be performed by Korean government lab (at owner’s expense; around $250).
   c. Animals with results less than 0.5 IU/mL will be held until the antibody response to revaccination results in an adequate titer.
Appendix A: Example APHIS Form 7001. A Veterinary Corps Officer (VCO), USDA Veterinarian, or GS Veterinarian must assign the certificate number and endorse the certificate for international export. An accredited US veterinarian can sign the APHIS Form 7001; BUT, the document is NOT valid until the certificate is endorsed by the area USDA veterinarian, VCO, or GS veterinarian.

### VETERINARY CERTIFICATION

I certify that the animals described in box 7 have been examined by me this date, that the information provided in box 9 is true and accurate to the best of my knowledge, and that the following findings have been made:

- **I have verified the presence of the microchip.** (Microchip is listed in box 7.)
- **I certify that the animal(s) described above and on continuation sheet(s), if applicable, have been inspected by me on this date and appear to be free of any infectious or contagious diseases and to the best of my knowledge, exposure thereof, which would endanger the animal or other animals or would endanger public health.**
- To my knowledge, the animal(s) described above and on continuation sheet(s), if applicable, originated from or are not quarantinable fomites and has/have not been exposed to fomites.

### ENDORSEMENT FOR INTERNATIONAL EXPORT (if needed)

**PRINTED NAME OF USDA VETERINARIAN**

Joe Johnson, DVM
CPT, VC
Official Veterinarian, Accreditation ID 020456

**LICENSE NUMBER AND STATE**
